Resultados (JaCoCo):

- La cobertura global del proyecto alcanza un **68%** de las instrucciones. (Sesgado por el paquete `user` que luego sera eliminado)
- Se hizo especial foco en la nueva arquitectura de registro separado por roles. Como resultado, los módulos `professional` y `client` cuentan con un **96% de cobertura** de código, garantizando que el flujo de persistencia y seguridad de ambos dominios es robusto frente a fallos.
