Resultados (JaCoCo):

Cobertura global: 36% de instrucciones, 26% de branches. Número bajo pero esperado para este punto del sprint.

Appointment es el módulo mejor cubierto (53% instrucciones, 64% branches) gracias al test de disponibilidad que escribimos, que cubre solapamientos, límites de jornada y bloques consecutivos.

Config.security tiene 76% de instrucciones.

Client tiene 13% y 0% de branches, los tests están escritos pero comentados.
